**Airport Carbon Accreditation celebrates one year since launch – cumulative CO₂ reductions of over 400,000 tonnes**

For immediate release 17 June 2010

**Milan, 17 June 2010:** At its 20th Annual Congress in Milan this week, European airport trade body ACI EUROPE marked the one year anniversary of the launch of Airport Carbon Accreditation, giving an update on the programme.

The institutionally endorsed¹ programme independently assesses² and recognises airports’ efforts to manage and reduce their CO₂ emissions and certifies airports at 4 different levels of accreditation (Mapping, Reduction, Optimisation and Neutrality). In the past twelve months, Airport Carbon Accredited status has been awarded to a total of 18 airports, including some of the busiest airports in Europe such as Paris CDG, Frankfurt Airport, Amsterdam-Schiphol, Stockholm-Arlanda and Oslo Airport.

The geographical spread of airports which have already become accredited covers the wider European continent – including airports as far North as Trondheim Airport, as far West as Manchester Airport, as far as South as Athens International Airport and as far East as Istanbul Airport.

ACI EUROPE’s 20th Annual Congress in Milan this week also coincides with the first renewed accreditation of the programme - host SEA Milan Airports. The company has succeeded with the accreditation applications of both Milan-Malpensa Airport and Milan-Linate Airport, achieving the Neutrality level – the highest accreditation possible. This level recognises that the airports have achieved a significant reduction in their carbon emissions, actively engaging stakeholders on its site to lower their respective emissions and finally, offsetting any of the remaining CO₂ emissions that are under its direct control.

**Ad Rutten**, President of ACI EUROPE and COO of the Schiphol Group said “With all that has been going on in European aviation in the past 12 months, it is heartening to see so many airports tackling their CO₂ emissions with such dedication. Some are just beginning the process, while others are already well advanced, but carbon neutrality for European airports remains the goal.”

He added “The achieved reduction of 411,390 tonnes of CO₂ is a good start, but watch this space. We already have clear signs of commitment from a further 20 airports that they will apply for accreditation in year two.”

**ENDS**

---

**Notes for editors:**

The IPCC (Intergovernmental Panel on Climate Change) has estimated that aviation’s total CO₂ emissions account for 2% of global emissions’ impact on climate change. Of that figure, airports’ own operations only account for up to 5%, but European airports are keen to tackle their greenhouse gas emissions – several individual airports operators having already committed to becoming carbon neutral in the past few years with some having already achieved this.

¹At last year’s launch of Airport Carbon Accreditation in June, over 30 airports – accounting for 26% of European passenger traffic – committed to becoming Airport Carbon Accredited. The programme is comprised of 4 progressive levels of accreditation: Mapping, Reduction, Optimisation and Neutrality. The programme is
administered by leading consultancy WSP Environment & Energy and overseen by an independent Advisory Board including representatives of the European Commission, ECAC (European Civil Aviation Conference) EUROCONTROL and UNEP (United Nations Environmental Programme).

²WSP Environment & Energy is the administrator of Airport Carbon Accreditation. It is one of the world’s largest environmental consultancy firms employing over 1,000 staff globally to provide innovative solutions to environment-related business issues. WSP Environment & Energy leads the field in carbon and climate change advice.

Airports that have become Airport Carbon Accredited to date:

- **Aéroports de Paris**: CDG Airport, France
- **Aéroports de Paris**: Orly Airport, France
- **Athens International Airport**, Greece
- **Avinor**: Oslo Airport, Norway  
  - **Avinor**: Kristiansand Airport, Norway  
  - **Avinor**: Trondheim Airport, Norway
- **Bologna Airport**, Italy
- **Dubrovnik Airport**, Croatia
- **Fraport**: Frankfurt Airport, Germany
- **MAG**: Manchester Airport, UK
- **Schiphol Group**: Amsterdam Airport Schiphol, the Netherlands
- **SEA Aeroporti di Milano**: Milan-Linate, Italy  
  - **SEA Aeroporti di Milano**: Milan-Malpensa, Italy
- **Swedavia**: Stockholm-Arlanda Airport, Sweden  
  - **Swedavia**: Stockholm-Bromma Airport, Sweden
- **TAG Aviation**: Farnborough Airport, UK
- **TAV Airports Holding**: Izmir Adnan Menderes International Airport, Turkey  
  - **TAV Airports Holding**: Istanbul Airport, Turkey

*ACI EUROPE is the European region of Airports Council International (ACI), the only worldwide professional association of airport operators. ACI EUROPE represents over 400 airports in 46 European countries. Member airports handle 90% of commercial air traffic in Europe, welcoming more than 1.5 billion passengers each year.*
